Blood Glucose Levels Leszek Szablewski 2020-01-08 The main source of energy for the body is glucose. Its low blood concentrations can cause seizures, loss of consciousness and death. Long lasting high glucose levels can cause blindness, renal failure, cardiac and peripheral vascular disease, and neuropathy. Blood glucose concentrations need to be maintained within narrow limits. The process of maintaining blood glucose at a steady state is called glucose homeostasis. This is achieved through a balance of the rate of consumption of dietary carbohydrates, utilization of glucose by peripheral tissues, and the loss of glucose through the kidney tubule. The liver and kidney also play a role in glucose homeostasis. This book aims to provide an overview of blood glucose levels in health and diseases.

Islam, What You Need to Know in the Twenty-First Century Ronald Lee Cobb 2011-08-10 At its core, Islam is a religion of peace. Its very name implies Salaam, Shalom, and Peace. In its first 100 years Islam controlled Spain, all of North Africa, Arabia, and much of the Middle East. Most of its development was peaceful and centered on a "Most Merciful Creator of All Things" emphasis. Europe would have become Islamic if Charles Martel of France in the West and the City of Vienna in the East, had not halted the spread of Islam. Extremists in the Twenty-First Century have too often wrapped themselves in the flag of Islam while they have repeatedly violated many of the teachings of the Qur'an and of the Hadith. You will find that the stories in this book rarely appear in the headlines of Western news media. These stories and their knowledge will help you find peace. Armed with these facts and this inner peace and knowledge, may you help bring more peace to our planet. The vast majority of the followers of Islam want to live in peace and prosperity. Prosperity can only come through understanding and through peace. May the peace of the Loving Creator be with you always on your spiritual journey through life.

Effect of Ramadan Intermittent Fasting on Different Fitness Among Young Muslim Men Anindita Singha 2022-03-19 more than one billion people in the world are Muslims. The major religious period of the Islamic

calendar is Ramadan which is considered as a period of purification, internal meditation and regeneration, when healthy post-pubescent Muslims fast from sunrise to sunset for 4 weeks (Zerguini et al., 2007). During the month of Ramadan Muslims abstain from eating, drinking and smoking from sunrise to sunset known as Ramadan intermittent fasting (RIF). Because the Islamic calendar is lunar, Ramadan occurs at different times of the calendar year over a 33-year cycle. This causes the occurrence of Ramadan during markedly different environmental conditions in the same country in different years (Leiper et al., 2003). The length of the RIF depends on the geographical location and the season of the year, and can be as long as 18 h a day in the summer of temperate regions (Meckle et al., 2008). During the month of Ramadan people are allowed to take only two meals in each day, one just before dawn known as Sahur meal and another after sunset known as Iftar meal. All types of foods are allowed during Sahur and Iftar meal but there is a trend for the majority of Muslims to eat foods that are rich in fats, animal proteins and sugar (Chaouachi et al., 2009; Leiper et al., 2003). Normally the gap between Sahur meal and Iftar meal is about 13 hours, i.e., during the RIF, every day the fasting individuals refrain from food and fluid intake for at least 13 hours. This might be a potential cause of dehydration during this time (Ramadan, 2002; El ati et al., 1995). Significance of Ramadan fast: Ramadan is a month of worship, and fasting is the mean of fostering piety. Muslims celebrate the glory of Allah (God) during Ramadan and thank Him for revealing the Qur'an, which they consider a guide for humanity. Muslim thinkers emphasize the religious significance of fasting and its implications for self-purification and spiritual growth, rather than the outward observance of the many rules regarding the fast (Ismail Poonawala, professor of Islamic Studies at University of California and Heather Laird.).

Ramadan Ausma Zehan Khan 2018-03-27 The month of Ramadan offers the opportunity to improve one's personal and spiritual behavior. By focusing on positive thoughts and actions, Muslims build a closer connection with God and come away from the month feeling spiritually renewed. Ramadan: The Holy Month of Fasting explores the richness and diversity of the Islamic tradition by focusing on an event of great spiritual significance and beauty in the lives of Muslims. Rich with personal stories and stunning photographs, Ramadan demystifies the traditions and emphasizes the importance of diversity in a world where Islamophobia is on the rise.

Ramadan Tamoh Art 2021-02-17 This book contains very important information about the sacred month of Ramadan. By the way, this book is normally intended for kids aged seven (7) years old and over; nevertheless, it can be used by adult Muslims to enrich their knowledge about the holy month of Ramadan. This book which contains 50 pages and well illustrated with beautiful pictures and drawings to attract the attention of children, presents very interesting information so as to make it easy to understand the month of Ramadan without problem and without worry. Indeed, this book deals with several points related to Ramadan such as: The definition of the month of Ramadan - The ninth month of the lunar calendar - The origin of Ramadan - The length of the month of Ramadan - Ramadan and the Quran - What is the night of "Laylat Al-Qadr"? - When does fasting become compulsory? - Ways of fasting for kids - The benefits of fasting for kids - The acts to be done by kids during the month of Ramadan - The points to be respected during the month of Ramadan - The prayers of "Tarawih" - The feast of Eid Al-Fitr or Eid Seghir - Zakaate Al-Fitr - The proportion of Zakaate Al-Fitr to be offered per person - When can Zakaate Al-Fitr be offered? - The prayer of Eid Al-Fitr - The place where the prayer of Eid Al-Fitr can be performed - The religious duty of kids during Aid Al-Fitr. Thus, all these subjects have been exposed in a simple and adequate way so that kids as well as adults can understand and grasp the concept of Ramadan according to the religion of Islam. Almost all the data and information regarding the holy month of Ramadan have been laid out in this book so that the goals of fasting during this holy month can be understood by kids, boys and girls alike, and even adults. Greek and Roman Calendars Robert Hannah 2013-11-20 The smooth functioning of an ordered society depends on the possession of a means of regularising its activities over time. That means is a calendar, and its regularity is a function of how well it models the more or less regular movements of the celestial bodies - of the moon, the sun or the stars. Greek and Roman Calendars examines the ancient calendar as just such a time-piece, whose elements are readily described in astronomical and mathematical terms. The story of these calendars is one of a continuous struggle to maintain a correspondence with the regularity of the seasons and the sun, despite the fact that the calendars were usually based on the irregular moon. But on another, more human level, Greek and Roman Calendars steps beyond the merely mathematical and studies the calendar as a social instrument, which people used to organise their activities. It sets the calendars of the Greeks and Romans on a stage occupied by real people, who developed and lived with these time-pieces for a variety of purposes - agricultural, religious, political and economic. This is also a story of intersecting cultures, of Greeks with Greeks, of Greeks with Persians and Egyptians, and of Greeks with Romans, in which various calendaric traditions clashed or compromised.

Caesarean Moon Births: Calculations, Moon Sighting, and the Prophetic Way Hamza Yusuf 2014-01-10 Prior to the advent of electricity, every night held the possibility of a celestial light show. People in even the most urban environments were exposed to the awe and majesty of the heavens, which clearly "proclaim the glory of God." The contemplation of the celestial orbs and their movements provided early man with the most direct connection to his Lord. In the Qur'anic story of Abraham, it is his observance of heavenly phenomena that leads him to his certainty of God's unity and transcendence. Since the time of the Seljuq Turks, the crescent moon has been a sign of Islam. For Muslims in North America, there has been much confusion regarding when Ramadan begins, when to fast, and when to break the fast. Hamza Yusuf provides clarity through this detailed and scholarly work that decisively makes the case for sighting the crescent moon with the naked eye, as has been the Islamic tradition for 1400 years. This is essential reading for anyone seeking guidance on this important and sacred matter.

Ramadan Susan Douglass 2003-08-01 Muslims around the world celebrate the month of Ramadan to honor Allah. During every day in that month, Muslims do not eat food between sunrise and sunset. Then, each night at sunset, they say special prayers and eat a special meal. After almost four weeks of fasting this way, they have a great three-day festival called Eid al-Fitr to celebrate the challenges they met during Ramadan and the coming year.

The Astronomical Calculations and Ramadan Zulfiqar Ali Shah 2009-01-01 This book shatters the myth that naked-eye sighting of the new moon and completing thirty days in the case of weather-related or other obscurities are the only two valid methods of determining the month of Ramadan. The author explains that certainty, not actual sighting, is the real objective of the Shariah and that the Qur'an does not mandate physical sighting. A careful analysis shows that those hadiths that seemingly require sighting actually require certainty. The assertion that all Muslim scholars prohibit the use of astronomical calculations, both in affirming or negating the month of Ramadan, is not correct. As calculation is now more accurate than naked-eye sighting, due to certain astronomical and scientific advancements, the use of calculation is the closest to the real objective of the Shari'ah and to the spirit of the hadiths.

Encyclopedia of Islamic Civilization and Religion Ian Richard Netton 2013-12-19 The Encyclopedia of Islamic Civilization and Religion provides scholarly coverage of the religion, culture and history of the Islamic world, at a time when that world is undergoing considerable change and is a focus of international study and debate. The non-Muslim world's perceptions of Islam have often tended to be dominated by unrepresentative radical extremist movements and media interpretations of events involving such movements, to the extent that many people are unaware of the depth and variety of Islamic thought. At the same time, many who have had a formal training in Islamic studies have tended to concentrate on the traditional, to the exclusion of the contemporary. The Encyclopedia of Islamic Civilization and Religion covers the full range of Islamic thought, in historical depth, but it also provides substantial coverage of contemporary trends across the Muslim world. With well over a thousand entries on Islamic theology, history, arts, science, law and institutions, and coverage of Islam in individual countries and cities around the world, the Encyclopedia of Islamic Civilization and Religion provides an extremely rich resource for students and researchers in religious studies and Middle Eastern studies. Entries are cross-referenced and bibliographies are provided. There is a full index. Routledge published The Qura'n: An Encyclopedia in 2005, an excellent companion to the Encyclopedia of Islamic Civilization and Religion.

Ramadan Moon Na'ima B. Robert 2015-03-15 Ramadan, the month of fasting, doesn't begin all at once. It begins with a whisper And a prayer And a wish. Muslims all over the world celebrate Ramadan and the

joyful days of Eid-ul-Fitr at the end of the month of fasting as the most special time of year. This lyrical and inspiring picture book captures the wonder and joy of this great annual event, from the perspective of a child. Accompanied by Iranian inspired illustrations, the story follows the waxing of the moon from the first new crescent to full moon and waning until Eid is heralded by the first sighting of the second new moon. Written and illustrated by Muslims, this is a book for all children who celebrate Ramadan and those in the wider communities who want to understand why this is such a special experience for Muslims.
