Nonplussed! Julian Havil 2007 Presents a collection of paradoxes from many different areas of math which reveals the math that shows the truth of these and many other unbelievable ideas. This book gives attention to problems from probability and statistics, areas where intuition can easily be wrong. It talks about the history and people associated with many of these problems.

Bookseller 1966 Vols. for 1871-76, 1913-14 include an extra number, The Christmas bookseller, separately paged and not included in the consecutive numbering of the regular series.

El-Hi Textbooks & Serials in Print, 2005 2005

Data Structures & Algorithm Analysis in C++ Mark Allen Weiss 1999 In this text, readers are able to look at specific problems and see how careful implementations can reduce the time constraint for large amounts of data from several years to less than a second. Class templates are used to describe generic data structures and first-class versions of vector and string classes are used. Included is an appendix on a Standard Template Library (STL). This text is for readers who want to learn good programming and algorithm analysis skills simultaneously so that they can develop such programs with the maximum amount of efficiency. Readers should have some knowledge of intermediate programming, including topics as object-based programming and recursion, and some background in discrete math.

Books in Print Supplement 1994

Saxon Math Intermediate 3 Saxon Publishers 2007-03 Written by Stephen Hake, author of the Saxon Middle Grades programs, Saxon Intermediate 3 is ideal for students looking for a textbook approach that provides a smooth transistion into Math 5/4. It is also helpful for students who are coming to Saxon from other programs. Math Intermediate 3 teaches mathematical concepts through informative lessons, helpful diagrams, and interactive activities and investigations.
